BOOSTER CLUB

LEGOMANIA

"LEGO fans unleash the creative powers of LEGO® MINDSTORMS® EV3! You can build robots that can walk, talk, think and much more."

That's how Lego promotes its Robotic Sets in the Mindstorms series.

Kids learn what it takes to tame a robot with all its strange features. On the discovery-rich way they will have first points of contact with the topic of programming, which can open doors for you in the future. We as the sponsoring association are more than happy to support so much excitement and tinkering and are eager to see the first "Albani-Bots". Have fun coding!

IT SHOULD BE TASTY!

Many a parent has probably wondered, and not only during the vacation season, how to manage the balancing act between the children's "wishful noodling" and the parents' "vegetable-giving" needs. Time and time again it works out quite well, but there are also the other days...

In order to increase the chances of success in the future, we would like to work together with all Albani families, teachers and staff of the Albani School to compile the children's favorite recipes in an "Albani eats delicious! cookbook.

The focus will be on healthy, delicious and above all (but not only) simple recipes. So join in and send us your recipes!

The recipes can be given to the teachers or sent directly to us:

KEYWORD: ALBANI ISST LECKER

DONATION MARATHON

The donation marathon for the school library goes into the next round. If there are still books, games, CDs and magazines in one or the other household that still want to be used, they can either be handed in directly to the library or to Mrs. Kulp in the teachers' room.
